

Express, the *best* all-around stainless steel propeller in the business

- 1.) Progressive Pitch
- 2.) Aggressive Cupping
- 3.) High Rake
- 4.) PointGuard mirror-like polished finish

Run **Faster**, Pull **Harder**, Handle **Better**

-  quick hole shot
-  high top end speeds
-  great lift
-  secure holding
-  great overall performance

Interchangeable **MasterGuard**[®] Hub System

Turning Point's patented **MasterGuard Hub System** is the only interchangeable hub system available with a rubber bushing. Each hub also has a marine brass spindle that will resist corrosion. The shell of each hub is aluminum or stainless steel, depending on which material of propeller you choose.

These hubs protect engines/drives against harsh vibrations and shift shock.

The MasterGuard Hub System is interchangeable with a variety of pitches. Now it's more economical to carry a spare or different pitch propeller. Aluminum propeller housings adapt to stainless hubs.

See reverse for engine applications
